

ENVIRONMENTAL POLICY

OF CZECH AIRLINES

We are the flag carrier of the Czech Republic ensuring connections to most European capital cities and to destinations worldwide. We offer services with high added value in the segment of air transport and related services. We represent the Czech Republic on the internal and foreign markets.

We understand, that the environment deserves our protection and that is why we declare this environmental policy of Czech Airlines, based on the following principles:

We respect legal regulations concerning environmental protection and we also meet other requirements regarding our activities.

We strive to achieve permanent decreasing of both direct and indirect impacts on the environment caused by our activities.

We implement and continuously improve environmental management system and environmental performance of the company.

When taking a strategic decision we always evaluate its possible impact on the environment, we apply the principle of prevention against any pollution of the environment.

We effectively use the capacity of our aircraft and other technology and we evaluate their performance from the point of view of their influence on the environment.

When expanding and renewing our fleet, we always consider emission and noise of the aircraft.

For aircraft and other technology maintenance, we use only such suitable technologies and resources in order to prevent or constantly decrease the environment pollution, including the production of waste.

We regularly and objectively evaluate the fulfillment of this policy and related objectives and we inform the public and other involved parties about the results of our environmental care.

We cooperate on the reduction of our influence on the environment with our suppliers, public administration and other partners.
